COMPANY OVERVIEW

At ECOLLABO8, We Lead the Change

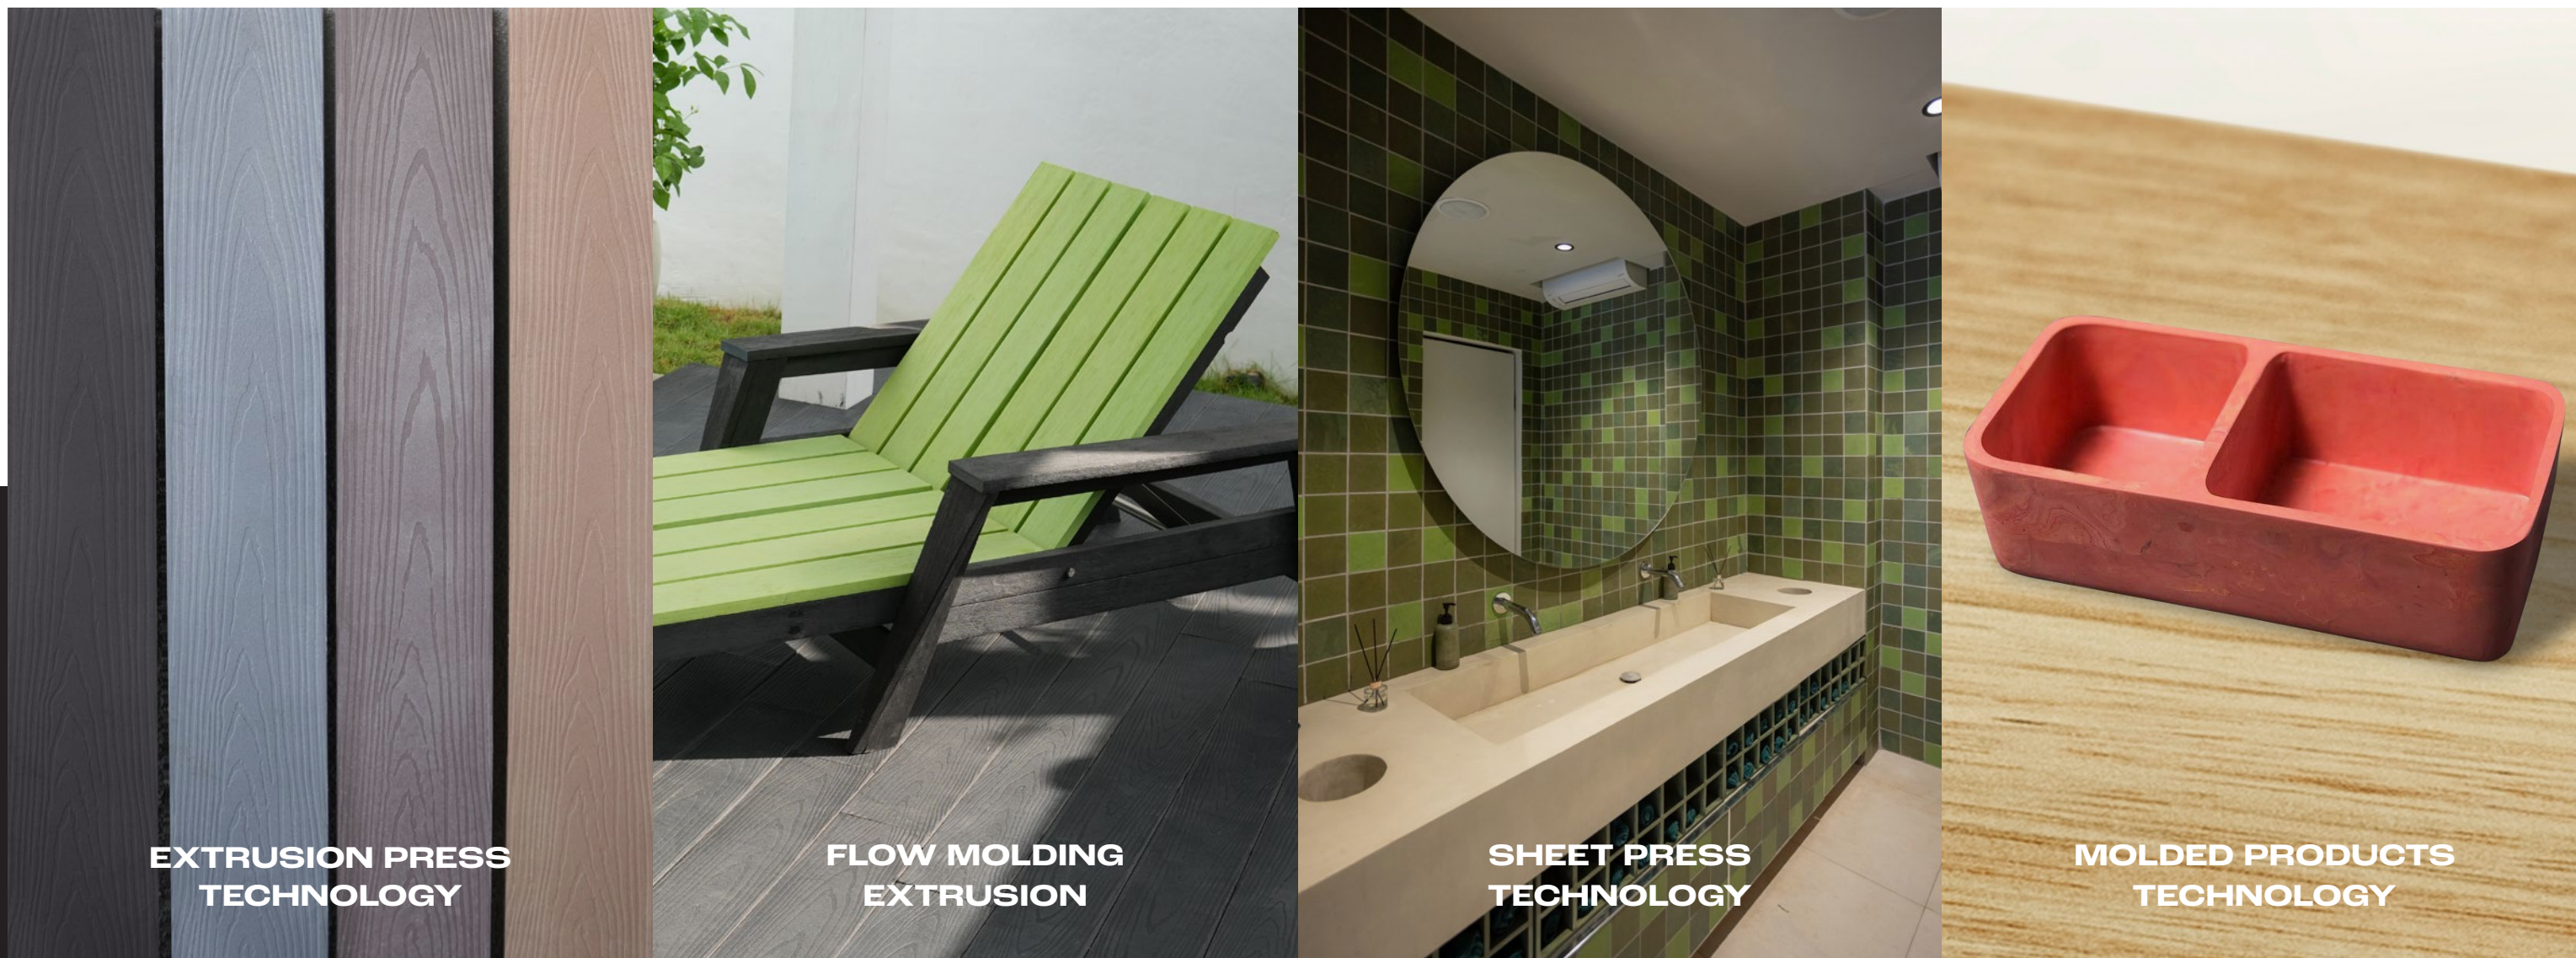

At ECOLLABO8, we believe in being part of the solution, not the pollution. Plastic waste is one of the world's most pressing environmental challenges. Globally, 91% of all plastic produced is never recycled, with 79% accumulating in landfills or polluting our environment due to inadequate waste management systems. In Indonesia, the situation is even more critical—plastic waste now outnumbers fish in parts of our waters, and shockingly, only 1% of collected waste is recycled.

Founded in 2019, ECOLLABO8 is a purpose-driven plastic recycling company dedicated to turning the tide on plastic pollution. Our mission is to reveal the hidden value of plastic waste by collaborating with local and global brands, driving meaningful change through innovative and sustainable solutions. We empower and educate local communities to redefine trash as a resource, paving the way for a cleaner, greener, and more sustainable future.

OUR EXPERTISE AND TECHNOLOGY

Innovative Recycling Meets Practical Design

**EXTRUSION PRESS
TECHNOLOGY**

**FLOW MOLDING
EXTRUSION**

**SHEET PRESS
TECHNOLOGY**

**MOLDED PRODUCTS
TECHNOLOGY**

Specialized for the construction sector, this technology recycles up to 400 kg of plastic and glass waste per hour. The result: durable, sustainable products such as paving, roof tiles, decking, and more, stronger than concrete and eco-friendly.

This technology produces durable, wood-like planks designed for outdoor use. Enhanced with UV stabilizers, these planks retain their color and resist fading, rain, sun, and termites. They are perfect for outdoor furniture and structures such as pergola, with a lifespan of hundreds of years.

Ideal for crafting flat panels for store product stands, indoor furniture, and more. With a daily capacity of processing 500 kg of plastic, this technology allows us to create a wide variety of products, including toothbrush holders, bath bomb boxes, ecotiles, shelves, and even large-scale installations like billboards or displays.

We design and manufacture aluminum molds, enabling the creation of branded custom products from recycled plastic. With a production capacity of up to 30,000 units per month, we can produce basically anything that fits a mold. Examples include combs, coasters, pocket mirrors, trays, tea boxes, trash cans, and more.

WHY ECOLLABO8?

Collaborate for a Sustainable Future

The world is changing, sustainability is no longer optional; it's essential. Businesses that embrace sustainable practices gain a significant edge, aligning with the Environmental, Social, and Governance (ESG) pillars that drive today's markets.

Sedex Member

As a Sedex member, we ensure the highest ethical and environmental standards across our supply chain. Our products are ready for export worldwide, adhering to international regulations while respecting labor rights, health, safety, and the environment.

Let's work together to drive meaningful, sustainable impact.

ECOLLABO8 IMPACTS

ALL SECTORS, GLOBAL REACH

We collaborate with partners across a wide range of industries, including beauty, hospitality, fashion, restaurants, concept stores, and architecture firms. Our partners such as The Body Shop, Melia, Havaianas, Sampoerna, Stilt Studio, and Marvel Indonesia, share our commitment to making a positive social and environmental impact.

INNOVATIVE & RESPONSIBLE PRACTICES

Our diverse range of products spans from coasters and pocket mirrors to toothbrush holders, product stands, display furniture, art installations, and even giant billboards. Every item is crafted with sustainability in mind, following strict guidelines and zero-waste production practices. As a Sedex member, we maintain the highest standards of ethical business practices and environmental responsibility.

9 TONS PER DAY

On average, we recycle 9 tons of plastic per day, a number that continues to grow as we constantly innovate and expand our recycling capacity to address the plastic waste crisis.

SOCIAL IMPACT & COMMUNITY ENGAGEMENT

Beyond business, ECOLLABO8 is committed to creating social value. We sponsor an orphanage, organize workshops, and support initiatives that improve the well-being of children. Our educational initiatives, including facility visits, further our commitment to a sustainable future for the next generation.

ALTERNATIVE CONSTRUCTION MATERIALS

WEATHERPROOF

Designed to withstand extreme weather conditions, our decking planks can endure heavy rain, intense sun, and high humidity without warping, or deteriorating. Perfect for both residential and commercial outdoor spaces.

ANTI COLOR-FADING

Thanks to advanced UV inhibitors, our decking planks retain their original color and vibrancy, even after years of exposure to sunlight. No need to worry about dull, faded surfaces.

FIRE-RESISTANT

Engineered for safety, our planks are highly resistant to fire, making them a secure option for outdoor and public spaces where fire risks may be a concern.

ZERO MAINTENANCE

Our decking planks require no sanding, staining, or sealing. A simple wash with soap and water is all it takes to keep them looking brand new, saving both time and money over their lifetime.

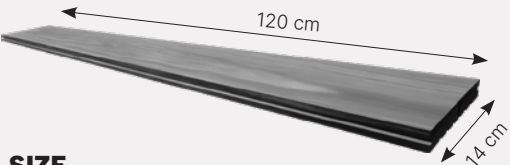

TERMITE-PROOF

Unlike traditional wood, ECOLLABO8 planks are immune to termite infestations. This ensures longevity and eliminates the need for chemical treatments, making them a safe and eco-friendly choice.

DURABLE

Built to last, these planks boast exceptional strength and resilience. They resist cracking, splintering, and fading, ensuring a flawless look and performance for decades.

PRODUCT SPECIFICATIONS

SIZE

Length	: 120 cm
Width	: 14 cm
Thickness	: 2 cm
1 sqm	: 6 Planks
Weight	: 5 kg

MATERIAL

Plastic bags, PP, multilayers sachet, recycled aggregate.

ECO IMPACT

Recycling 30kg of waste per sqm of decking produced.

Preventing deforestation of 35 hectares yearly.

ËCOLLABO8 DECKING IN COMPARISON

CATEGORY	ËCOLLABO8 DECKING	WOOD DECKING	WPC DECKING
Material Source	Made from low-value plastic waste and recycled aggregate.	Cut trees, leading to deforestation and habitat disruption.	Wood fiber and virgin plastic.
Sustainability	Eco-friendly, uses recycled materials. 	Contributes to deforestation and habitat disruption.	Contains new plastic and wood; less eco-friendly.
Durability	Resistant to fire, moisture, insects, decay, salt spray, and all weather conditions.	Prone to rot, decay, and insect infestations.	Prone to bending; fades and becomes brittle with sun exposure.
Maintenance	No maintenance; no painting or sealing needed.	Requires regular sealing and refinishing.	Needs periodic maintenance.
Cost-Efficiency	 More affordable upfront and requires no maintenance, ensuring significant cost savings over time.	 Higher upfront costs, especially for premium wood like Ironwood, with ongoing expenses for maintenance.	 Generally more expensive upfront with periodic maintenance and repairs adding to long-term costs.

OUTDOOR LIVING

WEATHERPROOF

Our outdoor furniture is engineered to thrive in any climate. Designed for resilience, it withstands intense sunlight, salty coastal breezes, and strong winds without compromising on appearance or durability. Built to last, it's the perfect sustainable choice for outdoor living spaces.

COLORSTAY TECHNOLOGY

Say goodbye to fading and wear! Our innovative UV inhibitors and stabilizers are infused directly into the material, providing long-lasting protection against harsh sunlight. This ensures vibrant, crack-free, and durable finishes that stand the test of time.

SUSTAINABLE

By recycling millions of plastics destined for landfills or oceans, we transform waste into valuable resources.

LOW MAINTENANCE

Enjoy effortless care with ECOLLABO8 lumber. A simple soap-and-water wash keeps it looking pristine—no painting, staining, or waterproofing required. It's an easy, hassle-free solution for outdoor use, saving you time and effort.

ÉCOLLABO  LIVING DESIGN

INDOOR LIVING

INNOVATIVE DESIGN

Blending form and function, our designs use recycled materials to create visually stunning and practical furniture for modern living.

DURABLE

Built to last, our furniture resists wear and tear while maintaining its sleek, refined appearance over time.

EASY CARE

Low-maintenance and eco-friendly, our pieces only require a quick clean—saving time, effort, and costs.

VERSATILE USE

Perfectly suited for any indoor setting, from living rooms to home offices, adding sustainable sophistication to every space.

SUSTAINABLE

Crafted entirely from recycled plastic, our furniture embodies our mission to reduce waste while delivering uncompromised style.

ALTERNATIVE CONSTRUCTION MATERIALS

SUSTAINABLE
Crafted from recycled plastic waste, our ECOTILES actively reduce the environmental impact of plastic pollution, transforming waste into a valuable resource.

DIVERSE AESTHETIC OPTIONS
Available in a variety of vibrant colors, with customizable options to suit any design vision or preference, offering unparalleled flexibility.

LIGHTWEIGHT
Lightweight and easy to handle, our tiles simplify installation compared to traditional heavier materials, saving time and effort.

LOW MAINTENANCE
Effortlessly maintained with just basic cleaning, our tiles offer convenience and cost-effectiveness over their lifespan.

MOISTURE RESISTANCE
Perfect for indoor applications, ECOTILES are designed to withstand humidity and moisture without compromising performance or appearance.

DURABLE
Engineered for longevity, ECOTILES are highly resistant to wear and tear, ensuring a reliable and lasting solution.

CSR & SOCIAL IMPACT

Empower your Corporate Social Responsibility (CSR) initiatives with ECOLLABO8. We specialize in helping organizations achieve their CSR goals by integrating sustainable and impactful practices into every project.

From recycling programs and upcycled product creation to community engagement activities, our expertise and resources are at your disposal. Whether you're aiming to reduce plastic waste, educate communities, or make a tangible environmental impact, we provide tailored solutions that align with your company's values.

Partner with ECOLLABO8 to turn your CSR vision into action, creating a positive legacy for your brand and the planet.
